### **SECTION ONE - Management Summary & Introduction**

Europe's diesel car future looks bright . . . . .	13
Has European diesel car demand peaked? . . . . .	16
In 2006 diesels accounted for the first time for more than half the new cars sold in Western Europe . . . . .	16
Oil's seemingly inexorable march to little short of \$150 a barrel in July . . . . .	17
Almost overnight, one of the attractions for running a diesel car, notably cheaper diesel fuel, had disappeared . . . . .	17
Underlying trends in petrol engine downsizing . . . . .	18

### **SECTION TWO - European & US Overview**

Petrol/diesel pump price differentials . . . . .	20
End of long-running diesel boom or just a blip? . . . . .	21
Rocketing diesel fuel prices rekindle buyers' interest in latest fuel-sipping petrol engines . . . . .	21
Western Europe petrol/diesel passenger car sales market share 2002-2008 . . . . .	21
Most diesels will travel up to a third further on the same tank of fuel than a similar power petrol-powered car . . . . .	22
German petrol/diesel price differentials 1990-2008 . . . . .	22
From 24.8% in 1998 to record 53.3% in 2007 . . . . .	23
Traditional diesel cost benefits are being watered down . . . . .	23
Signs are that of late diesel fuel has regained at least some of its earlier competitiveness . . . . .	24
Austria, still Europe's diesel capital in 2002 with a diesel car share of almost 70%, sees progressive comeback from petrols . . . . .	24
Fuel price parity, after years of cheaper diesel, couldn't fail but weaken diesel demand in the short term . . . . .	25
Diesel pump price advantage partly restored . . . . .	25
Two speed Europe . . . . .	26
CO2 vehicle taxes, diesel-petrol price relationships and EU's forthcoming 130 g/km CO2 limit hold key to future health of diesel car market. . . . .	26
In markets like Germany and Italy for instance, still without CO2 vehicle taxes, demand for diesels has started to shrink. . . . .	26

Diesel passenger car share comparison YTD 2008 vs 2007 . . . . .	27
Diesel pump price in Britain is 10% higher than premium grade petrol, yet diesel demand has continued to rise sharply . . . . .	27
Diesel future looks bright . . . . .	28
Petrol engines that pretend to be diesels . . . . .	28
Booming worldwide diesel demand lifts pump prices to hitherto unseen heights . . . . .	29
In Germany, where diesel prices have spiralled to petrol levels, some buyers have clearly turned back to petrol cars . . . . .	29
Germany's September 2008 diesel share slips to 43% from 47.2% a year earlier . . . . .	29
Rocketing diesel fuel prices continue to strengthen demand for cheaper petrol-powered cars . . .	30
Yes to diesel typical economy, but there is also a steep price to be paid . . . . .	30
Delivering diesel type fuel-economy, as illustrated by the Prius hybrid is one issue, but matching today's more flexible diesels on the increasingly crucial value-for-money front remains an altogether different issue . . . . .	31
